I hope the settlement as proposed can be accepted soon. I have never felt comfortable about this entire mess, but I believe the settlement is at least fair to most parties involved. I thank Microsoft every day for my access to the internet through the Microsoft network that powers WebTV. I want Microsoft to be able to get back to business doing what they do best, i.e. make competetive products, and let the free market decide who's product they want. I thank you for your time.

Sincerely yours,  
Rick Valusek
